DETAILED ACTION

Specification

1. The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- (e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Application/Control Number: 10/621,390

Art Unit: 2613

Claims 49-55 are rejected under 35 U.S.C. 102(e) as being anticipated by Park et al., (hereinafter referred to as "Park").

Park discloses apparatus for processing video data comprising (Park: figure 2): a motion intensity level calculation unit calculating motion intensity levels indicating a motion intensity (Park: column 7, lines 60-62) of respective inter frames included in an input video data by using motion compensation information of the respective interframes (Park: column 13, lines 40-67; column 14, lines 15-20); and a histogram calculation unit calculating a histogram indicating frequency of the respective motion intensity levels based on the motion intensity levels of respective inter frames (Park: column 8, lines 10-15), as in claim 49.

Regarding claim 50, Park discloses that the histogram includes a plurality of ratios, a respective ratio being a number of inter frames having the respective motion intensity levels to a number of all inter frames included in the input video data (Park: column 17, lines 40-67; column 18, lines 1-4), as in the claim.

Regarding claim 51, Park discloses wherein the motion intensity level is calculated by using motion compensation values of respective predetermined sized blocks included in an interframe (Park: column 12, liens 50-65), as in the claim.

Regarding claim 52, Park discloses wherein the motion intensity level is a ratio of a number of blocks having zero motion compensation values to a number of all of predetermined sized blocks included in an inter frame (Park: column 15, lines 30-60).

Regarding claim 53, Park discloses a grouping unit dividing a video stream into at least one video data, selecting the input video data among the at least one video data and outputting the input video data to the motion intensity level calculation unit (Park: figure 13).

Regarding claim 54, Park discloses a quantization unit quantizing the motion intensity levels and outputting the quantized motion intensity levels to the histogram calculation unit (Park: column 17, lines 1-10).

Regarding claim 55, Park discloses a grouping unit divides the video stream by using a scene cut detection algorithm (Park: column 17, lines 60-67: video clips arrived at using a scene cut), as in the clam.

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Mehrotra discloses a method and system for object oriented motion based video description.

5. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Andy S. Rao whose telephone number is (571)-272-7337. The

examiner can normally be reached on Monday-Friday 8 hours.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Mehrdad S. Dastouri can be reached on (571)-272-7418. The fax phone number for

the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
